Claim Objections

1. The applicant's amendment made to Claim 56 in view of the previous objection to said claim suffices to overcome the basis of said objection. Accordingly, said objection is hereby withdrawn.

Allowable Subject Matter

2. Claims 34-35, 37-42, 44-48, 50-54, and 56-65 are allowed. For the purpose of issue, these claims have been respectively renumbered 1-2, 3-8, 9-10, 14-16, 17-21, 22, 11-13, and 23-28, respectively.

The following is an examiner's statement of reasons for allowance:

While the delaying first and second signals by time intervals is known in the art of signal processing and source angle determination, as evidenced by at least the teachings of Lea, the examiner has not found prior art that either teaches in its entirety or makes obvious the use of such delaying in providing a time increment representative of separation of a first source from a second source or establishing a number of location signals each corresponding to a different location relative to the first source, as claimed in each of the independent claims, when such limitations are considered in combination with each and every other limitation included in said claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing

delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
